

NAHTM VENDORS

Charlotte, North Carolina September 2010

NAHTM thanks our Conference Exhibitors:

Sizewise: Jason Hall-Vicky Craig

Toll free: 800-814-9389

Sizewise designs, manufactures and sells a diversified line of medical equipment from intelligent bed frames to mobilization and transport equipment to therapeutic mattresses to movable medical equipment such as ventilators, monitors and more.

For more than 20 years, Sizewise product lines have been engineered to meet the needs of critical and acute care patients, homecare patients, or consumers who want a luxury sleep experience based on the most advanced medical surface technology on the market.

aXtra Hand: Gloria Rentz

Toll Free (586)777-0018 Fax (866) 777-0535
<http://www.axtrahand.com/www/>

aXtraHand LLC has designed a **Clamping System** (CH-1003) that can be attached permanently to your existing wheelchairs to which your existing IV Poles can be secured and released easily and quickly.

The **Wheelchair to IV Pole Clamping System** (CH-1003) enables you to focus on moving the patient in a wheelchair without having to strain yourself while holding onto the IV Pole.

The **Anti-Rotation Bar "ARB"** (CH-1006) is an added safety feature that alleviates the possibility of the IV Pole spinning if it were accidentally kicked or if the IV Pole base struck a solid object.

NAHTM thanks our 2010 Conference Exhibitors:

Patient Focus Systems: Ron Gregg

1-800-787-3477

On time delivery of patients to clinical appointments is essential for the efficient operation of those departments. The Patient Transport System® contains a database, and various communication interfaces to automate tasks that are necessary to ensure that patients being moved between their rooms and clinical departments arrive on time. These tasks include data entry and record keeping, trip scheduling, and trip progress reporting. PTS has been designed to help avoid conflicts when scheduling patient trips, to coordinate multiple trips in order to minimize patient transports, and to speed up discharge notification.

Staxi Corporation: Sharon Crooker

877-677-8294 Ext 4

STAXI is a revolutionary, clinically developed people transportation system. It is the leading wheelchair alternative and the best selling nestable transport chair worldwide.

STAXI is built specifically for large, busy facilities such as hospitals, providing temporary transportation for people with disability or who are distance-challenged, safely and comfortably.

STAXI clients include top hospitals and major airports both in the U.S.A., UK and Europe.

PHS West: Ben Chapmen

Toll-Free: 1.888.639.5438 Fax: 763.498.8128

PHS West, Inc. has been helping people find answers to their materials and equipment storage and transportation issues for over a decade. Our mission is to find a cost-effective, ergonomically correct way to handle any resources in virtually any setting

TransCart: Dennis Davis

1-800-641-2278

The need for nursing personnel is at an all time high, while the supply is inadequate to meet the current demand. The Transcart helps to solve part of your personnel problem by easily moving patient and luggage together. One nurse or other staffer functions in transportation normally requiring two, saving the hospital **tens of thousands of dollars** in costs.
